Day 1

Saturday 24th January

After a long flight from the UK, our United Airways flight touched down at a sunny Houston Airport where we had a few hours wait before our second flight to San José in Costa Rica. We arrived about 9.30pm local time. After quickly negotiating the formalities of passport control and baggage reclaim, the group assembled, found our local guide, Yehudi Hernandez, and our driver Alberto, who drove us to our first hotel in Heredia, about 20 minutes away. We met Fiona and Brian at the hotel; they had arrived a day early and had already seen an enviable number of birds and butterflies in the garden of the Bougainvillea Hotel.

Day 2

Sunday 25th January

Most of the group wanted a pre-breakfast bird watch, so Tim and Yehudi met everyone in reception at 6am, for an hour before breakfast. Here we saw flocks of Crimson-fronted Parakeets, Great-tailed Grackles, Rufous-collared Sparrows, Brown Jay, Blue-crowned Motmot, Black-headed Saltator, Hoffmann's Woodpecker, Blue-grey Tanager, Summer Tanager, Rufous-naped Wren, Rufous-crowned Warbler, Rufous-tailed Hummingbird, Inca Dove, Clay-coloured Robin plus many others. A fine start to our Costa Rican bird list.

We then headed through San José into the Talamanca mountains. We stopped on route to view Montezuma's Oropendola, Meadowlarks and White-tailed Kites, and then stopped for a coffee at a café with Hummingbird feeders. Here we saw Scintillant, White-throated Mountaingem and Magnificent Hummingbirds plus Flame-coloured Tanagers, Mountain Elaenia and Acorn Woodpecker. We saw a few birds of prey en route, mostly Black and Turkey Vultures but also a Black Hawk-Eagle. We then turned off the mountain top road (at an elevation just under 3000m) to drop deep into the beautiful valley where the Saverge Resort is situated (at about 2200m). The Hummingbird feeders here were brimming with Hummingbirds, including our first Green Violetears and Stripe-tailed Hummingbird. We also saw Slaty Flowerpecker, Yellow-thighed Finch and Silver-throated Tanager.

After a delicious, filling lunch we headed on a walk to the waterfalls. We spotted lots of Sulphur-winged Parakeets, Spot-crowned Woodcreeper, Louisiana Waterthrush, Wilson's and Tennessee Warblers, Collared Redstarts, Mountain Robin, Yellowish Flycatcher, Black Phoebe, Ruddy Tree-runner, Common Bush Tanager,

Sooty-crowned Bush Tanager, Black-faced Solitaire, Torrent Tyrannulet and Dipper. Overhead were dozens of White-collared Swifts, Swallow-tailed Kites and Blue-and-white Swallows. One of the highlights was finding a nest of a Scintillant Hummingbird with two tiny eggs in it. They were just like two Tic-tacs in size and shape. A few people managed to see Quetzals on our first day too, but Yehudi was confident he would find some for everyone.

Day 3

Monday 26th January

A sunny morning, and we met at 6am for a pre-breakfast ramble. Straight away, we spotted some Spotted Wood Quails then, a few minutes later, we were watching a male Resplendent Quetzal right next to our lodge. We also saw a pair of Boat-billed Flycatchers in the lodge garden.

Straight after breakfast, we headed up the road to the “Quetzal spot” and there were four birds in this area, giving good views, but against the sun. We also saw Spangle-cheeked Tanagers and a Philadelphia Vireo here. We then headed up to the Cerres del Morte, at over 3000m altitude, where the habitat was paramo, high altitude scrub above the tree line. We all managed to see Volcano Hummingbirds and Volcano Junco, but not everyone managed to see Timberline Wrens or Peg-billed Finch. We then headed to a cafe where we saw Fiery-throated Hummingbirds, amongst the usual species. We slowly headed down to the lodge, stopping en route for Silky Flycatchers and Large-footed Finch. Another tea stop at a cafe with bird feeders gave us some great photographic opportunities.

After lunch, we headed back to the Quetzal spot but it was quiet, so we opted to go back up to the cafe with the bird feeders, where we saw and photographed Flame-coloured Tanagers, Sooty Thrush, Yellow-bellied Siskins, Large-footed Finches, Summer Tanager plus a Red-tailed Squirrel. Another fantastic day was had by all.

Day 4

Tuesday 27th January

Today we had a pre-breakfast walk, then headed north to try again for more Quetzals. Five opted to potter around the trails by the lodge, and they had an amazing time, spotting six Spotted Wood Quails and three Quetzals. When the rest arrived at the Quetzal spot, there were three Emerald Toucanets on view, but the two Quetzals we saw were rather distant. We did see a few other good birds like Yellow-winged Vireo and Black-cheeked Warbler. Then a male Quetzal flew into a fruiting tree not far away. We saw him briefly, but then he flew right over our heads and disappeared into the forest. We then drove south of the lodge to look at more rainforest, and here we found a pair of Collared Trogons. David found us all a Spot-crowned Woodcreeper which a few managed to photograph. We also had really good views of Spangle-cheeked Tanagers and Collared Redstarts. Flame-throated Warbler, Olivaceous Wren and Grey-breasted Wood Wren were also new.

After a leisurely lunch we headed in jeeps up to the high oak forest but things were pretty quiet there, apart from a Hairy Woodpecker and a Buffy Tuftedcheek.

Day 5

Wednesday 28th January

We awoke to rain, which rather dampened our pre-breakfast walk, yet we still managed to see three Quetzals, Golden-bellied Flycatchers and a Black Guan. After breakfast we drove south towards Las Cruces, and headed

out of the rain as we left the hills. Late morning, we stopped for a coffee in a wonderful place that overlooked forest canopy. As we had descended in altitude, there was a complete suite of new birds for us, including lots of Tanagers: Cherrie's, Bay-headed, Speckled, Golden-crowned and Palm. We also saw Scarlet-thighed Tanager, Red-faced Barbet, Buff-throated Saltator, White-throated Robin and Violet Sabrewing. Perhaps least expected was a Grey-breasted Wood Rail wandering around in the hotel garden. These woodland rails are normally shy and elusive. Some really close Swallow-tailed Kites were popular too. On the road down the mountains we saw a road casualty Tamandua. We hoped we would be seeing some live Tamanduas before the holiday was over.

We headed onwards, taking in a back road where we saw Fork-tailed Flycatcher, Yellow-headed Caracara and Smooth-billed Ani. At our rural lunch stop, we spotted a Green Iguana trotting across a football pitch, although he was a bit camera-shy. We continued our drive south, and arrived in the late afternoon at La Cruces Biological Station. This site is just five miles from the Panama border and, at 1500m, we were expecting a different set of birds from those high in the Talamanca Mountains. As we drove down the driveway, there were Crested Guans and Chestnut-mandibled Toucans in the trees above. We spotted Agoutis wandering around the grounds and several new birds: White-crowned Parrot, Spot-crowned Euphonia, Green Honeycreeper and Streaked Saltator. After dinner we had a night walk, but only spotted a few crickets, spiders and katydids.

Day 6

Thursday 29th January

We were about early for a pre-breakfast walk, and the bird tables were full of colourful birds: Silver-throated Tanager, Buff-crowned Tanager, Cherrie's Tanager, Speckled Tanager, Spot-crowned Euphonia and Green Honeycreeper, to name but a few. Around the grounds we spotted chachalaca, Brown-hooded and Blue-hooded Parrots, Black-and-white Warbler, Baltimore Oriole, and screaming flocks of Crimson-fronted Parakeets. After breakfast we wandered into the forest, and were bewildered by waves of small birds moving through. It was quite difficult to see them all, but they included Plain Antvireo, Lesser Greenlet, Dusky Antbird and Wood Thrush. A few in the open were more obliging, such as a Scaly-crested Pygmy Tyrannulet and Rufous-breasted Wren. A lucky few saw a Coati wandering around in the forest. We also saw our first blue Morpho butterflies. These massive butterflies are iridescent blue and inhabit rainforests in Central and South America.

We pottered around the gardens for a couple of hours at lunchtime then, after that, we drove to some lagoons near San Vito, which were amazing. We saw nesting Crested Oropendola, Orange-chinned Parakeets, Orange-billed Nightingale-Thrush, Fiery-billed Aracari, Bronzed Cowbird and Masked Tityra. On the lagoons we saw Purple Gallinules, Jacana, Blue-winged Teal and Lesser Yellowlegs. We then returned to La Cruces for an hour before dark, where we saw the usual Toucans and Tanagers. We were still adding new species with White-shouldered Tanager, Olive-striped Flycatcher and Common Tody-Flycatcher.

Day 7

Friday 30th January

We started off with a walk around the grounds before breakfast, but were distracted by a Crested Caracara posing in a tree close by. We also spotted lots of chachalaca and a Horned Guan, plus a couple of posing Toucans. Chris spotted an Olivaceous Piculet, and a lucky few saw a Violaceous Trogon while we were eating breakfast. The rest of us had to make do with a mixed flock of Parrots and Parakeets. After breakfast, we headed out and stopped for a view part way down the mountains. Here, David spotted a Laughing Falcon perched. We later passed a small pool where we saw Least Grebes, Green Herons, Neotropical Cormorant and various Egrets.

We stopped at some farmland by a river, where we saw White Ibises and Green Kingfishers. Another roadside pool gave us a Wood Stork, and two Mealy Parrots were a bonus.

We then drove to Esquinas Lodge in the Piedras Blancas National Park. This delightful lodge is ringed by forested hills and the forest birds regularly visit the camp. We saw Spectacled Caimans on a roadside pool at the Lodge, and several Iguanas. Agoutis were wandering around this lodge too. After lunch at Esquinas, it was really hot so we had a siesta until 3pm, when we drove to nearby farmland. Here we saw lots of Brown-hooded Parakeets, Wedge-billed and Cocoa Woodcreepers, White-tailed Kites, two species of Caracara, Wood Rails, Gallinules, Jacanas, and various water birds including more Ibis and Little Blue Herons. Around the camp, we saw a Great Curassow wandering about, plus a few other things like Scarlet-rumped Cacique and Buff-rumped Warbler. We also saw another Morpho butterfly, larger and less spotted than the one at Las Cruces. After dark the heavens opened, and we had torrential rain for about two hours without let up. Fortunately it stopped after dinner, so we went on a night walk. Great weather for frogs! We saw Cane Toads, Bullfrogs, Brown River Frogs, a Salamander and best of all, a rare Glass Frog.

Day 8

Saturday 31st January

We were up at 5.30am for a pre-breakfast walk, but it had only just stopped raining. Around Esquinas, we saw Riverside Wrens and Charming Hummingbirds. Just on the edge of a forest trail we found a Rufous-tailed Jacamar, looking just like an oversized hummingbird. And speaking of oversized hummingbirds, we also saw Band-tailed Barbthroats and Long-billed Hermits. Around the camp, we saw a male and three female Great Curassows, which were highly photogenic. After breakfast, we walked on two of the forest trails, and saw quite a few typical lowland forest birds: Black-hooded Antshrike, Black-bellied Wren, Black-capped Ant Tanagers, Black-striped Woodcreeper, Ruddy Quail-Dove and Great Tinamou. The weather was stiflingly hot again, so we had a long siesta lazing around the lodges, watching Basilisk Lizards and Morpho butterflies, plus the occasional Agouti.

Mid-afternoon, we set out again in the bus and birdwatched in the agricultural fields. The wet palm plantations had lots of Purple Gallinules and Smooth-billed Anis. We also spotted a Meadowlark and several Red-breasted Blackbirds. Yehudi spotted a distant White Hawk, so we drove down a farm track for a closer view. Here we saw the White Hawk, plus White-necked Puffbird, both species of Caracara and Yellow-bellied Elaenias. As we drove back, we spotted a Ruddy Spinetail so we got out to look, and he was alarm-calling vigorously. He made such a fuss that three other birds came to see what was happening, which happened to be new species: Plain Wren and Red-legged Honeycreepers. Then we saw what all the fuss was about. The Spinetail was defending its nest against a Striped Cuckoo, another new bird. As we drove back into camp, we saw six different Curassows wandering round the camp.

Day 9

Sunday 1st February

We gathered again at 5.45am, and the Snapping Turtle was out in the open in the small fish pond. We wandered through the grounds and managed to see two new Trogons: Slaty-tailed and Black-throated. Birds seemed a little quiet, but we added Northern Waterthrush. As we passed the Caiman pool, Yehudi froze in his tracks. There, on a branch at the back, was one of Costa Rica's most elusive and sought after birds, Agami Heron. Yehudi had hardly seen any before, and he said that few had ever photographed it. But here it was posing for us. After

breakfast, a couple of people rushed back to watch the heron, and were treated to a wonderful spectacle: as it came close to the water to catch a fish, a Caiman jumped out of the water at it, flushing it into the forest. We then set off to Sierpe where we were to catch our boat to Casa Corcovado. We had to wait for high tide, then we set off down the river, stopping to watch wildlife. We were in two boats, so not everyone saw everything, but we spotted Amazon Kingfisher, Scarlet Macaws, Mangrove Black Hawk, Lineated Woodpecker, Mangrove Swallow, Osprey and a Toucan. Most unexpected were three Lesser Nighthawks, roosting on branches in the mangroves. We also found 11 Long-nosed Bats roosting in a tree over the water. Best of all was a group of Squirrel Monkeys, but they kept mostly hidden behind leaves. After 45 minutes, we hit the coast at Drake's Bay and started to see seabirds: Sandwich and Royal Terns, Magnificent Frigatebirds, Brown Booby and Brown Pelican. We also saw a Whimbrel perched on the rocks.

We arrived to a wet landing at Casa Corcovado 45 minutes after hitting Drake's Bay, and were taken in a truck to the beautiful lodge set deep in primary rainforest. At 4pm we met for a walk round the grounds and watched the sun set over Drake's Bay, sipping Margaritas and enjoying Pelicans, Frigatebirds and a Scarlet Macaw.

Day 10

Monday 2nd February

Today was an early start, with a 5:15am breakfast and a 6am boat trip that took us into the heart of Corcovado National Park. The trip along the beautiful coast was full of pelicans and frigatebirds. After an hour we arrived in the bay. Landing at low tide on the rocks was difficult. We really wished we had brought beach shoes, but once we were on dry land we swapped to our wellingtons (loaned by the lodge). Straight away we saw a Black-throated Trogon. Then we wandered down the beach enjoying a variety of shorebirds, including Whimbrel, Least and Spotted Sandpipers and Semi-palmated Plovers. We also saw fresh Tapir footprints. We then headed into the forest, spotting a couple of Tiger Herons and several beautiful blue Morpho butterflies. Then we spotted our first mammal, just an Agouti. Then a few yards further we saw three Spider Monkeys, which can be difficult to see. Things were quiet for the next hour, with just the occasional bird, such as Baird's Trogon, Crested Guan and Great Curassow. Then Ruth spotted a Northern Tamandua on the ground. We watched it for a few seconds before it climbed a tree to feed. Then it descended and wandered off into the scrub. A few minutes later we saw a troupe of Howler Monkeys and, just minutes later, we saw a large group of Squirrel Monkeys.

We had lunch at the Biological Station when someone found a tapir in a nearby river gully. We watched it snuffling about, at only about 10m away, but it soon wandered back into cover. Walking back to the boat, we spotted more Howler Monkeys and more Squirrel Monkeys, plus the occasional Toucan. We headed back in two boats. One group spotted five Pantropical Spotted Dolphins, and Alison saw a Green Turtle. The other group stopped by to look at a frigatebird and Brown Booby colony. Also, one American Oystercatcher flew past among the scores of Brown Pelicans. After a siesta, we went out birdwatching again, and watched the sun set. We saw a few choice new species including Violaceous Trogon, Blue Dacnis, Southern Lapwing and Zone-tailed Hawk. After dark, we took a night walk into the forest and saw various bugs, plus a Coral Snake and a Vermiculated Screech Owl.

Day 11

Tuesday 3rd February

We were up again at 5.45am and, after a quick coffee, we were out watching lots of wildlife. First, we found a group of White-faced Cappucins, and had really good scope views in a flowering tree. Some flowering trees in

the corner of the gardens produced plenty of good birds: Bright-rumped Attila, Summer Tanager and Masked Tityra. But two things really stood out. First were Manakins. Not only did we see Red-crowned and Blue-capped Manakins in the same tree, we also watched Red-crowned, lekking. He did a Michael Jackson moonwalk along the branch towards his female. It was as if he were on runners, as nothing seemed to move as he glided along the branch. The second highlight was a fantastic Turquoise Cotinga, that we had tried unsuccessfully to find for the past week. It is a stunning turquoise bird, with bright pink chest spots. It was hardly worth mentioning things like Scarlet Macaws and Toucans.

After breakfast we headed along the beach and quickly spotted a Coati in a tree. We then stumbled upon yet another Manakin: Orange-collared Manakin, which was just as beautiful as the others. We also saw lots of huge Morpho butterflies. Soon after, the manager offered us a boat trip to look for cetaceans and seabirds. Just as we were getting ready to go, someone pointed out a Three-toed Sloth up a tree in the garden, which had a young baby in tow. Alas the cetaceans failed to show on the boat trip, but the birds were good and we did see two Turtles, probably Olive Ridley's Turtles. We saw various waders roosting on rocks: Whimbrel, American Oystercatcher and Yellow-crowned Night Heron. We also saw Laughing Gulls, Royal and Sandwich Terns. But the highlight was visiting some small islets with trees, where we saw nesting Frigatebirds and Brown Boobies, plus a few pairs of Red-footed Boobies. After a late lunch and a siesta, we went out again and enjoyed a big group of Spider Monkeys brachiating through the trees, some had babies clinging to them. After that, a few of the group ventured into the forest, where we found two rare and elusive birds: Streak-chested Antpitta and Pale-billed Woodpecker, a huge relative of the extinct Ivory-billed Woodpecker.

Day 12

Wednesday 4th February

We didn't have time for a pre-breakfast walk today, but we still managed to see Curassow, Coati and Spider Monkeys. After breakfast, we headed down to the jetty where seven noisy Macaws were in the trees. The boat trip was pretty quiet, but we still managed to see more Squirrel Monkeys and we added Tricoloured Heron to the trip list. It was a long drive north to Carara, but we stopped briefly en route to look at King Vultures, Roseate Spoonbills and Scissor-tailed Flycatcher.

We arrived at Carara just in time for lunch, then had a siesta until 3pm, when we set out. Our first stop was the Tarcoles River, where we saw 40 South American Crocodiles, including some enormous ones. We then drove down a side road near the hotel, and stopped to look at some Trogons. There were two Violaceous Trogons, but Yehudi heard Black-chested Trogons too, and soon found two of those as well. We also watched some Howler Monkeys at the same site, and heard a Pygmy Owl calling. They are notoriously difficult to locate, but Tim caught a glimpse, and soon the entire group was enjoying a Ferruginous Pygmy Owl through the scope. A little later, we drove further and stopped at a regular site for Black-and-white Owls and, right on cue, there were two sitting in the favoured tree. We then went to the beach and watched the sun set, with pelicans and frigatebirds flying around.

Just before dinner we went out with torches to look for frogs but we were worried as all the ponds had dried up. However, Yehudi heard one calling, and we soon located it and we all enjoyed photographing it.

Day 13

Thursday 5th February

Our final day in Costa Rica, and we were out at 6.45am. One of our first birds was a huge Spectacled Owl that flew across and perched in full view. We managed to add plenty of new birds on this last day: Rose-breasted Grosbeak, Streaked Flycatcher, Scaly-breasted Hummingbird, White-whiskered Puffbird, Northern Barred Woodcreeper and Black-faced Antthrush. There were also other good birds such as Macaws, Pale-billed Woodpecker, Painted Buntings and Fiery-billed Aracari. Alas, it was time to head to the airport after breakfast, but Yehudi managed to point out one last bird, a Turquoise-crowned Motmot on roadside wires. As we headed back to San José airport, we could see large plumes of smoke rising from Turrialba, Costa Rica's most active volcano.

Day 14

Reptiles & Amphibians

Green Spiny Lizard, *Sceloporus malachitus*

Jumping Anole, *Anolis polylepis*

Spectacled Caiman, *Caiman crocodilus*

South American Snapper Turtle, *Chelydra acutirostris serpentine*

Snouted Tree-frog, *Scinax boulengeri*

Common Rain Frog, *Craugaster fitzingeri*

Helmet-headed Lizard, *Corytophanes cristatus*

American Crocodile, *Crocodylus acutus*

Olive (Pacific) Ridley Sea Turtle, *Lepidochelys olivacea*

Asian Gecko, *Lepidodactylus lugubris*

Butterflies

Mexican Silver-spotted Fritillary, *Dione moneta poeyii*

Tailed Nymphalid, *Hypanartia dione arcaea*

Banded Peacock, *Anartia fatima*

Morpho, *Morpho helenor marinita*

Glasswing, *Greta morgana oto*

Postman, *Heliconius melpomene*

Green Iguana, *Iguana iguana*

Common Basilisk, *Basiliscus basiliscus*

Marine Toad, *Rhinella marina*

Emerald Glass Frog, *Espadorana prosoblepon*

Salamander, *Bolitoglossa ligicolor*

Savage's Bullfrog, *Leptodactylus savage*

Brown Iguana, *Ctenosaura similis*

Red-eyed Tree-frog, *Agalychnis calidryas*

Coral Snake sp, *Micrurus nigrocinctus?*

Lowland Rocket Frog, *Silverstoneia flotator*

Zebra Longwing, *Heliconius charithonius*

Malachite, *Siproeta stelenes*

Daggerwing, *Marpesia merops*

Pink-tipped Satyr, *Cithaeris pireta*

Isabella Tiger, *Euides isabella eva*
