Tour participants: Rob Mileto (tour leader), Yehudi Hernandez (local leader) and Ramon Vargas Monge (local driver & guide) with 12 Naturetrek clients

## Day 1

Wednesday 2nd March

### London Heathrow to San Jose (Heredia)

For most of us, an 11 hour flight routed over the frozen Canadian wilderness and down over the USA delivered us to a sunny Houston Airport. We then had a few hours wait before our flight of just over three hours to San José in Costa Rica. After making our way through immigration and customs, we met up with our local guide, Yehudi. From here it was just a short drive to our hotel (the Bougainvillea) and a very welcome night's sleep.

## Day 2

Thursday 3rd March

### Heredia to Villa Lapas, near Carara National Park and Rio Tarcoles

Today was hot and sunny. Most of the group met up for a pre-breakfast bird walk in the lovely flowery grounds of the hotel. We spent the first half an hour or so letting the birds come to us! There were Rufous-collared Sparrows, Hoffmann's Woodpeckers, Blue-grey Tanagers, Rufous-tailed Hummingbirds, Inca Doves, a Plain Wren, and Clay-coloured Robins, to name but a few. Overhead, we saw flocks of Crimson-fronted Parakeets. Eventually we strolled and caught sight of several more species including Brown Jay, Steely-vented Hummingbird, Squirrel Cuckoo, and a rather handsome Variegated Squirrel – our first mammal.

After a fine buffet breakfast at which we properly met the four group members who had travelled separately, we packed our bags into our coach. Before setting off we put a telescope on a Tropical Screech Owl roosting in the garden which only some of the party had seen earlier, and on a perched and rather stunning Blue-diademed Motmot.

It was then time to set off west into the Pacific lowlands and we were soon seeing both Black and Turkey Vultures circling overhead. As we approached the coast, we briefly detoured away from the hotel and were rewarded with, amongst others, Black-mandibled Toucan, Wood Ibis, Snowy Egret, Bare-throated Tiger Heron, Grey Hawk, Mangrove Black Hawk, and Scarlet Macaw from the coach, and Black-striped Woodcreeper, Magnificent Frigatebird, Black-headed Trogon and Turquoise-browed Motmot from a little stroll in some forest.

We arrived at the Hotel Villa Lapas, near Carara National Park, at lunchtime and after a quick freshen up, we tucked into a fine buffet lunch.

There was then time for a short siesta in the heat of the early afternoon before we all set off for the (optional) boat cruise on the nearby Rio Tarcoles. Just before we did so, many of us had great views of some Fiery-billed Aracari and Grove-billed Ani. We were soon at the riverside and seeing birds aplenty, including Spotted Sandpiper, Least Sandpiper, Osprey, and Mangrove Black Hawks in abundance. As we toured the creeks there were many more species to be seen: Boat-billed Heron, Black-crowned and Yellow-crowned Night Herons roosting in the mangrove trees, and a Roseate Spoonbill preening in the distance. We did particularly well with the kingfishers, with four species seen: Green, Belted, Ringed and the seldom seen American Pigmy. Unsurprisingly, mangrove-themed birds were prominent and we spotted Mangrove Vireo, Mangrove Swallow

and Mangrove Warbler. As the sun began to set, we approached the ocean at the river mouth. Here, Brown Pelicans roosted with Neotropical Cormorants and Anhingas in a tree, and Royal and Sandwich Terns roosted on the sand bar opposite.

Dinner was followed by the checklist, which was interrupted by a sighting of a very smart Spectacled Owl, a welcome interruption if ever there was one.

## Day 3

Friday 4th March

### Carara National Park and nearby

The weather today was sunny in the morning, and cloudy with a few spots of rain in the afternoon. Our pre-breakfast walk began with Scarlet Macaws, which is always an exciting start. There were also many other birds, the top spots perhaps being Orange-billed sparrows, Common Tody-Flycatchers and Social Flycatchers.

After breakfast, we headed off to the nearby Carara National Park. As we stepped off the coach, we were greeted by a lovely little Thick-billed Euphonia. From then on it was pretty much non-stop birds as we walked the trails. There was a wealth of Tanagers (White-shouldered, Blue-grey and Palm), and Trogons (Black-headed, Gartered, and Black-throated), as well as Long-billed and Stripe-throated Hermits, Rufous-tailed Hummingbird and an annoyingly fleeting glimpsed of a Ruby-throated Hummingbird. A perched Crane Hawk showed us its unfeasibly long legs, and Chestnut-backed Antbirds skulked in the undergrowth. On the mammal side, the overgrown guinea-pig that is the Central American Aguti was a welcome spot, and Variegated Squirrels dashed along branches.

After a lovely lunch, we spotted some very smart Fiery-billed Aracari as we departed for another forest walk. Not five minutes into this we spotted Geoffroy's Spider Monkeys that made their way through the canopy by making good use of their prehensile tails. A little further on there were many Scarlet Macaws, and we managed to pick out a Brown-throated Three-toed Sloth amongst the foliage. As we strolled, crashing leaves signalled more monkeys – these were White-headed Capuchins who entertained us hugely with their foraging antics. As we strolled on and then back to the bus, there were many more birds to be seen, of which a Rufous-tailed Jacamar was a top spot, but it was also good to see Grey Hawk, Northern Royal Flycatcher, Plain Xenops and an all too brief view of a Purple-crowned Fairy.

On the way back to the Lodge, we failed to see an owl, but saw many Lesser Nighthawks and an excellent sunset that turned the landscape red.

## Day 4

Saturday 5th March

### Villa Lapas to Corcovado Jungle Hotel

Today was partly cloudy, but hot. At breakfast there were a few choice birds to be seen: the lovely Painted Bunting, a Bare-throated Tiger Heron, and a Belted Kingfisher as well as the ever popular Fiery-billed Aracari and Scarlet Macaws.

As we drove southwards to our embarkation point for the boats that would take us to our next Lodge, we paused to see Double-toothed Kite, a perched Northern Crested Caracara and a delightful Scissor-tailed Flycatcher.

When we arrived at the quayside there was coffee and biscuits waiting, Pale-vented Pigeons in the nearby trees and Green Heron on the Water Hyacinths in the river. On the boats and on the river (Serpias) itself, we were still spotting birds like Golden-naped Woodpecker and Orange-chinned Parakeets (the two species tussling over a potential nest hole) and White-headed Capuchins feeding in the mangroves. Once we were out over the exciting surf and into the Pacific Ocean, there were Brown Boobies and squadrons of Brown Pelicans to be seen. We had a wet landing through the surf at the Lodge entrance and were immediately 'greeted' by Cherrie's Tanagers.

Lunch was followed by a siesta and then a stroll. The flowery garden held Scaly-throated Hermit, Blue Dacnis, Spot-headed and Olive-backed Euphonias, Summer Tanager and the drab but very endearing House Wren. Amongst the mammals, Spider Monkeys took massive leaps of faith between branches. We ended up at the bar by the viewpoint with drinks and snacks overlooking the ocean. Here there were lovely Manakins (Blue-crowned, Red-capped and Orange-collared) and Honeycreepers (Shining, Red-legged and Green) aplenty, as well as the gorgeous Golden-headed Tanager.

Dinner was followed by a night walk with a Three-toed Sloth (nicknamed Neil) as the highlight, though we also saw scary wolf spiders and a whip scorpion.

## Day 5

## Sunday 6th March

### Sirena in the Corcovado National Park

After a cloudy morning the weather brightened in the afternoon, but it was hot throughout. An early breakfast was followed by the adventure of boating through surf and off to the Sirena Ranger Station in the Corcovado National Park. Here, it was pretty much non-stop action on the bird and mammal front. Great Curassows and Crested Guans, although turkey sized, walked remarkably silently through the undergrowth. Bird parties contained such delights as Black-striped Woodcreeper, Black-hooded Antshrike and Dot-winged Antwren. Scattered liberally amongst these were Roadside Hawk, Grey-chested Dove, Long-billed Hermit, Blue-throated Goldentail, and Black-throated, Slaty-headed and the near endemic Baird's Trogons. For the mammal lovers there were Spider Monkeys, Coati, and a gang of Collared Peccaries that snuffled away not ten metres from where we stood.

We enjoyed a packed lunch at the Ranger Station with a pair of Mangrove Black Hawks and fly pasts of Scarlet Macaws. Meanwhile Howler Monkeys 'howled' from a nearby tree in which they were also clearly visible.

Our return boat ride was closer to the coast and the rocky islets held Magnificent Frigatebirds and Brown Boobies, as well as some stunning scenery.

Arriving back through surf, we had time for a quick siesta followed by drinks and snacks at the viewpoint bar. Today the manakins were joined by a Bay-headed Tanager. A short stroll brought us to an alternative viewpoint via Masked and Black-crowned Tityras at the top of a dead tree, along with some Palm Tanagers. Sunset here included a fly past by a Yellow-headed Caracara.

We walked back in the semi-darkness and found the poster-worthy Red-eyed Tree Frogs and, as we made our way up the hill to the Lodge, the fireflies came out to seemingly light our way.

## Day 6

Monday 7th March

### The Rio Serpias mangroves and Violinetta Island

Today we had light rain in the morning and a partly cloudy afternoon. Again it was hot throughout.

We had a more leisurely start at 6.30am and about half of us opted for a water-based morning of cruising the ocean, and then the mangroves at the river mouth. The rest enjoyed themselves in the hotel gardens and saw such beauties as Aguti, Red-lored Amazon, Cherrie's Tanager, Lineated Woodpecker, Band-tailed Barbthroat and a very smart White-throated Jacobin.

The boat party were entertained by domestic pigs, belly deep in the mangrove mud, exposing morsels for the attendant Willet, Whimbrel, Little Blue Heron, Lesser Yellowlegs and Ruddy Turnstone. As we chugged along the channel, some Yellow-billed Cotingas in the distance caused great excitement amongst the local guides but, in all honesty, they were so distant, they could almost have been any modest sized white bird! Other choice species that we saw were a few Three-toed Sloths, Green Honeycreeper, Grey-chested Dove and a rather excellent Laughing Falcon, which even laughed for us.

Late in the morning we approached a landing platform to see a huge American Crocodile slink off into the muddy water. So, it was with some trepidation that we had snacks here before heading off over the breakers at the river mouth, an added attraction in its own right, and to a group of small offshore islands that held breeding Brown and Red-footed Boobies and the attendant Magnificent Frigatebirds. We then headed for home and some lovely lunch.

It was siesta time after lunch. We met up at 4pm for a stroll around the gardens where the top spots were probably Violet-headed and Charming Hummingbirds, although the Summer Tanager, Black-striped Woodcreeper and Shining Honeycreeper were not to be sniffed at! We ended up at the viewpoint where snacks and drinks were again enjoyed as the sun set over the ocean.

Dinner was followed by a short night walk with a pugnacious little brown leaf litter frog seen, in addition to the wolf spider and whip scorpion, as seen on a previous night.

## Day 7

Tuesday 8th March

### Corocovado Lodge to Esquinas Lodge (near Piedras Blancas National Park)

The weather today was sunny and hot. We breakfasted at 6am to give us time for a wildlife hunt on the boat journey back to Serpias. Heading out one last time through the surf, we were soon seeing the occasional Royal Tern and Magnificent Frigatebirds above our heads, but the highlight was probably the pair of Brown Boobies that were floating along on a large chunk of flotsam and seemed happy with our close approach. Once in the river mouth we started spotting more creatures, including some relatively close Yellow-billed Cotingas and very

close Orchard Oriole and Purple Gallinule. Perhaps everyone's favourite spot was a large troop of the impossibly cute Central American Squirrel Monkeys that paraded past in the trees near our boat.

Once back on land, we changed and freshened up (with views of Green-breasted Mango) and set off again in our coach. It was a relatively short journey to our next stop, the Esquinas Rainforest Lodge, but we still managed to see Broad-tailed Hawk, Swallow-tailed Kite, Smooth-billed Ani and Grey-necked Wood Rail

The lodge itself is in a forested stream valley and as we had drinks and lunch, there were White-lined Bats to be seen in the dining room, and also Basilisk Lizards. Outside, there was a Long-billed Hermit, many Cherie's Tanager and, post lunch, a Green Kingfisher came to fish in the adjacent pool.

In the heat of the afternoon we had a siesta and then set off at 4pm for more wildlife spotting. After ticking Snapping Turtle and Blue-throated Goldentail near reception, we wandered down the lodge access track. Here there were more Goldentails, the rather splendid Rufous-tailed Jacamar, Slaty-tailed Trogon, Yellow-bellied Elaenia, Rose-throated Becard, and Willow and Piratic Flycatchers. Further down the track there was pasture land and hawking over this were Costa Rican Swifts, and we had a fly past by Blue-headed Parrots. Grey-headed Chacalacas fed in a distant bush and Black-striped Sparrow fed nearby. These were just a handful of the bird species we saw! On the mammal side, an Agouti sneaked up a track.

After a lovely dinner, we set off on a night drive and saw several Paruques and an excellent Striped Owl on some power lines.

## Day 8

Wednesday 9th March

### Esquinas Lodge and nearby

A pre-breakfast walk in the grounds revealed Blue-diademed Motmot, Golden-naped Woodpecker, Common Tody-Flycatcher, Green and Shining Honeycreepers, Chestnut-sided Warbler, a perched Yellow-headed Caracara, and two Crested Guans feeding in a palm.

The post-breakfast walk in the forest started with some excellent views of a Buff-rumped Warbler. In the forest, Yehudi explained how important recycling is for all life there. The soils are actually very poor and the verdant growth relies on the creatures and fungi of the forest floor to break down the fallen leaves etc and return their nutrients to the plants above. We found a tent making bat (probably Striped Yellow-eared Bat) under its leafy tent and several birds could be heard, but most made an excellent job of hiding!

It was hot and humid, so we had a long siesta until 3.30pm when the heavens opened, but we set off anyway as we were birding from the bus! Our first new bird was a rather lovely Red-breasted Blackbird in a pasture field and nearby there were Red-lored Amazon and Blue-headed Parrot in the same tree, and a Brown-throated Parakeets flew overhead. A little further on we spotted a chunky Lineated Woodpecker on a large stump, a Thick-billed Seed-Finch, and a Grey-necked Wood Rail with fluffy black chicks.

On the post dinner night walk, the rain had brought out the amphibians with Savage's thin-toed Frog, Cane Toad and a Red-eyed Tree Frog all seen, and many more heard.

## Day 9

## Thursday 10th March

### Esquinas Lodge to La Cruces Research Station

The walk before breakfast revealed the usual suspects such as Cherrie's Tanager, Fiery-billed Aracari, Orange-billed Sparrow and a 'hair in curlers' female Great Curassow.

We packed our bags and drove up into the foothills near the Panamanian border, stopping quite frequently to see such beauties as Amazon Kingfisher, White-tailed Kite, Fork-tailed Flycatcher, Tropical Mockingbird and some Crested Oropendulas at their odd pendulous nests. However, star bird was between a Swallow-tailed Kite at a nest with chicks, and a perched Bat Falcon. They caused the equally lovely Lineated Woodpecker that was also present to be largely ignored!

We arrived at Las Cruces Biological Station just in time for a pizza lunch followed by a little siesta. In the afternoon we took a walk in the grounds that are also a botanical garden. Here, we soon saw Silver-throated Tanager, a tree full of Crimson-fronted Parakeets, Thick-billed Euphonia, Golden-hooded Tanager, Ruddy Ground Dove and White-throated Thrush. We ended up at a viewpoint next to the dining room, where bananas on a bird table were attracting some of these same bird species, and we spotted Summer Tanager, White-fronted Parrot, Paltry Tyrannulet and an Aguti eating fruits on the lawns below.

## Day 10

## Friday 11th March

### La Cruces (am) and nearby wetland (pm)

Today was hot all day with sun in the morning and part cloudy in the afternoon. Some of us were out at 6am and watching Cherrie's and Silver-throated Tanagers on the bird table, and Blue-and-White Martins on the building. Then, as we strolled through the botanical gardens, we were impressed not only by the huge leaves of the fish-tailed 'King Kong' Palm and other 50 metre tall palms, but also the fine diversity of birds. These included Tropical Parula, Black and White Warbler and Slate-throated Whitestart all in one tree, as well as perched Broad-winged Hawk, Common Bush Tanagers and a Red-faced Spinetail.

After breakfast, we strolled in the direction of a tower that overlooks the canopy, but there was much to see on the way: the same tree full of Crimson-fronted Parakeets as the previous day, a Yellow-bellied Elania, a pair of lovely Squirrel Cuckoos, Rufous-breasted Wren, and Brown-hooded and White-crowned Parrots.

From the tower we had broad, sweeping views of forest and pasture with tall brooding mountains in the distance. Floating effortlessly above were several Swallow-tailed Kites and some eventually floated over our heads, much to everyone's pleasure. As a final treat, we had a fly past by a rather scary-looking Black Hawk-Eagle.

In the late morning and early afternoon we had a siesta, punctuated by lunch with fleeting views of a Green Hermit.

Around 3pm we set off in the bus for a nearby wetland in search of waterbirds. Whilst we only saw a Purple Gallinule there, nearby we managed to spot Tropical Mockingbird, Bronzed Cowbird, a handful of Crested Oropendula, many Orange-chinned Parakeets and a single dinky Olivaceous Piculet.

As we arrived back in good time, some opted for a walk through the grounds and were soon watching an Agouti nibbling in the sunshine. Later, a viewpoint afforded good views of Northern Crested Caracara, Rose-throated Becard and Spot-crowned Euphonia. Others saw Great Curassows from their cabins and Streaked Saltator on the bird table.

## Day 11

Saturday 12th March

### La Cruces to Savegre Hotel (in the Talamanca Mountains)

Today's weather was sunny intervals; hot in the morning and cooler in the mountains in the afternoon. On the verandah before breakfast there were the usual colourful tanagers to be seen (Summer, Silver-throated, Speckled and Golden-hooded). Into the bargain, a Golden-olive Woodpecker turned up just as we moved in to eat.

Once packed, we set off on the long drive north. Part way through the morning we spotted a couple of King Vultures circling amongst the usual Turkey and Black Vultures. Around 11.30am we arrived at our lunch stop and busied ourselves watching Green and Red-legged Honeycreepers at the fruit-filled bird tables nearby. So colourful were these that it was hard to get anyone interested in the Tennessee Warbler that was also there! In the trees nearby were Grey-headed Chachalacas and Fiery-billed Aracari. After a lovely lunch, a couple of large Green Iguanas tried to raid the bird table but were too large to do so successfully.

We continued our journey around 1pm and a chance passing by a roadside sewage works added Blue-winged Teal and Black-bellied Whistling Duck to our bulging list, along with the already seen, but still rather lovely Southern Lapwing. A little later on, a Red-tailed Hawk perched obligingly on a roadside tree for us.

In mid-afternoon we stopped for coffee at a café on the 'Cerro de la Muerte' (the mountain of death!). Here, at 3100 metres, we saw our first hummingbird feeders - and five new species of hummingbird (Magnificent, Volcano, Fiery-throated, Scintillant and Green Violet-ear). In the gardens around the café were Large-footed Finches, Slaty Flowerpiercers, and the stunning Long-tailed Silky Flycatcher.

We tore ourselves away from this idyllic spot to visit the Paramo - tropical, montane vegetation above the continuous timberline. Here, shrubby vegetation and short bamboos dominated and the harsh climate limits birdlife - but we still managed to spot an American Kestrel.

From here we descended into a valley towards our hotel and stopped briefly to scan the trees. We were unbelievably lucky to spot a Resplendent Quetzal next to the road! It perched and even called for many minutes whilst many photographs were taken and 'oooohs' exclaimed, due to its resplendentness! Eventually, it flew off into the forest and we continued our journey, only to stop shortly afterwards for another lovely bird; a Blue-throated (aka Emerald) Toucanet.

We arrived at the Savegre Hotel around 5pm to many more hummingbirds on feeders, along with an Acorn Woodpecker. However, after the long journey, most of us called it a day and retired to our rooms.

## Day 12

Sunday 13th March

### Savegre Hotel grounds and nearby

It was a chilly start before the day warmed up, and before breakfast some of us had a wander around the immensely flowery hotel gardens. Here, as well as the many birds that were now familiar friends, there were still new species to be spotted. We saw Grey-tailed Mountaingem, Northern Tufted Flycatcher, Yellow-winged Vireo, Ruddy-capped Nightingale-Thrush, Wood Thrush, Wilson's Warbler and Sooty-capped Bush Tanager.

A buffet breakfast was followed by more wanderings. This time we roughly followed the course of the Savegre river and again, as well as the usual suspects, we found Mountain Elaenia, Grey-breasted Wood Wren, Black-faced Solitaire (sadly fleeting), Yellow-bellied Siskin, Blackburnian Warbler, Chestnut-capped Brush Finch, Black-thighed Grosbeak, and the lovely Flame-throated Warbler, which were all new for us. A Spangle-checked Tanager (also new) was busy fighting its own reflection in a car wing mirror and a Torrent Tyrannulet (new) clung to near vertical boulder sides in the river. We ambled back past pools full of farmed trout and many enjoyed coffee at the feeders with their hosts of hummingbirds and tanagers

After lunch and a short break, we headed off in the coach to a nearby café where we had coffee and swirly buns overlooking feeders. A variety of birds we were now familiar with popped in and out whilst we sipped. It gave us perhaps our best views of Flame-coloured Tanager, Acorn Woodpecker and even the diminutive Wilson's Warbler, which usually is well hidden behind leaves.

On our return journey we were hoping for another view of the quetzal, but sadly it was not to be. We did though, have great views of a band-tailed Pigeon (ok, it did look remarkably like a Wood Pigeon!) and also a very smart Black Guan. We were back at our hotel in time to pack, have a hot beverage and check-in online before a final ticking of the checklist and a delicious buffet dinner.

## Day 13

Monday 14th March

### Savegre Hotel to UK flight

An intrepid few met up at 6.30am for one final early morning stroll. The hummingbirds were just beginning their morning activity at the feeders, and we only had a final quick look at the tiny Volcano Hummingbird before setting off along the river. We soon spotted the first of three new birds for our voluminous list – a Yellowish Flycatcher. Whilst this wasn't the most excitingly colourful bird, it was still good to see. The next new spot was far more striking – at the top of a tree in the early morning sun was an enormously bright green Golden-browed Chorophonia. Shortly after that, the final of a trio of new spots were a pair of rather lovely Spotted Wood Quail.

We had a final delicious breakfast and then started our journey. We did stop briefly to have a final look for quetzal, but it was not to be. We saw a 'burping' volcano (Turrialba) with a little smoke cloud above it, and the valleys below were clothed in cloud. All too soon we were at the airport and off to Heathrow via Houston on our overnight flights home.

## Day 14

Tuesday 15th March

### Arrive London Heathrow Airport

Our overnight flight landed at Heathrow Airport and another Naturetrek adventure came to an end.

### Receive our e-newsletter

Join the Naturetrek e-mailing list and be the first to hear about new tours, additional departures and new dates, tour reports and special offers. Visit [www.naturetrek.co.uk](http://www.naturetrek.co.uk) to sign up.

### Naturetrek Facebook

We are delighted to launch the Naturetrek Facebook page so that participants of Naturetrek tours can remain in touch after the holiday and share photos, comments and future travel plans.

Setting up a personal profile at [www.facebook.com](http://www.facebook.com) is quick, free and easy. The [Naturetrek Facebook page](#) is now live; do please pay us a visit!

## Species Lists

Birds (✓ - seen but not counted; H – heard)

Number next to species refers to the page/species order in the Helm Field Guide 'BIRDS OF COSTA RICA' by Garrigues & Dean, where the name has changed.

	Common name	Scientific name	March											
			3	4	5	6	7	8	9	10	11	12	13	14
1	Great Tinamou	<i>Tinamus major</i>		1		1								
2	Grey-headed Chachalaca	<i>Ortalis cinereiceps</i>							4			3		
3	Crested Guan	<i>Penelope purpurascens</i>			1	1				2				
4	Black Guan	<i>Chamaepetes unicolor</i>											1	
5	Great Curassow	<i>Crax rubra</i>				5	1				1	2		
6	Spotted Wood Quail	<i>Odontophorus guttatus</i>												2
7	Black-bellied Whistling Duck	<i>Dendrocygna autumnalis</i>										2		
8	Muscovy Duck	<i>Cairina moschata</i>	1	1	1									
9	Blue-winged Teal	<i>Anas discors</i>										29		
10	Wood Stork	<i>Mycteria americana</i>	30	3										
11	American White Ibis	<i>Eudocimus albus</i>	40				3	4				1

13	Crab-eating Raccoon	<i>Procyon cancrivorus</i>	1											

## Reptiles & Amphibians

Green Spiny Lizard, *Sceloporus malachitus*

Jumping Anole, *Anolis polylepis*

Spectacled Caiman, *Caiman crocodilus*

South American Snapper Turtle, *Chelydra acutirostris*

Brown Iguana, *Ctenosaura similis*

Green Iguana, *Iguana iguana*

Common Basilisk, *Basiliscus basiliscus*

American Crocodile, *Crocodylus acutus*

Savage's thin-toed Frog (bullfrog), *Leptodactylus savagei*

Red-eyed Tree-frog, *Agalychnis calidryas*

Lowland Rocket Frog, *Silverstoneia flotator*

Green and Black Poison Dart Frog, *Dendrobates auratus*

Cane Toad, *Rhinella marina*

A leaf litter toad, *Rhaebo* sp?

A Cat-eyed snake, *Leptodeira* sp

## Notable invertebrates

A Bush Cricket, *Tettigoniidae* sp

Common Blue Morpho, *Morpho helenor*

Menelaus Blue Morpho, *Morpho menelaus*

A Swallowtail, *Urania fulgens*

A tailless whip scorpion, *Phrynus* sp?

A wolf spider, *Lycosa* sp?
