Highlights

The 'Unknown India' tour was a great success. We enjoyed great sightings with highlights including watching eleven Tigers, two Leopards, Sloth Bears and 169 species of birds.

Day 1

Tuesday 27th March

The tour started with overnight flights from the UK to India

Day 2

Wednesday 28th March

Group members arrived on time at Nagpur airport. From the airport we went to the Radisson Blu Hotel and checked in. Later Yusuf briefed the group over dinner about plans for the next day.

Day 3

Thursday 29th March

We met in the hotel lobby before starting our two-hour journey to Tadoba. On the way we saw quite a few birds. We reached our destination, Sarvsara Jungle Lodge at 1pm.

After checking in and after lunch we went on our first safari of the tour. We drove straight to Panderpauni waterhole as Tigress P2 with young cubs around three to four months old had been sighted earlier in the morning. As we reached the area we saw a few vehicles already lined up. We secured our position and waited. There was a Sambar kill at the edge of the water. Soon we saw the mother with two cubs appear at the waterhole. They drank and the cubs seemed to be in playful mood. One of the cubs went straight to the Sambar kill, climbed upon it and started to pull its ear. The other cub joined in and they started practicing their basic instincts. The mother got up, went to the Sambar and made an incision so that the cubs could feed. Then she went back to the shade to rest, while the little ones started feeding on the Sambar. On the way back we saw Tigress P1. She came out of the bamboo thicket and started walking on the road. We followed her for quite a distance but time was running out, so we continued. Further on we were rewarded with the sighting of two more sub adult Tigers. Everyone was excited that we had seen six individual Tigers in three different sightings.

In the evening at the lodge, we met at 7.45pm to do the checklist before a scrumptious dinner.

Day 4

Friday 30th March

There was nip in the air this morning. After refreshing tea and coffee, we went for our morning safari. While driving we came across the two sub adult Tigers on the road. One had already crossed and we saw it partially. The other one was confidently walking on the road and then settled down on the roadside in the meadow. When we reached Panderpauni waterhole we saw the dominant Tiger feeding on the Sambar kill. Later the mother with two cubs arrived and the cubs joined their father in the feast. The father then left the kill and went to the bund to rest in the shade, so the mother joined the cubs in the feast.

For our afternoon drive we went to a different zone. We saw quite a few birds like Common Redshank, Common Greenshank and Green Sandpiper, to name a few. We also saw quite a few mammals including Gaur, Sambar and Spotted Deer. Whilst we were driving, Susan spotted a female Painted Sandgrouse. When we reversed the sandgrouse stood still; then we realized there was a tiny chick next to the jeep tyre. We were thrilled and scared at the same time, thinking we might have run over other chicks. When we moved forward a little we saw two more chicks in the middle of road, unharmed. Then the mother went and helped them cross the road by covering them under her wings. Later we saw a Tigress with two sub adults. They were in the stream next to the track in dense undergrowth. The mother was partially seen but the sub adults gave us a good show, with one of the female sub adults crossing the track.

In the evening we did the checklist, which was followed by dinner.

Day 5

Saturday 31st March

This morning we had a refreshing coffee and tea before setting off for our safari in Zone 2. We saw a few pug marks and quite a few birds but the striped cat remained elusive, although we did have good sightings of at least five different Chousinghas.

After lunch we again went for a safari and drove straight to the waterhole, where we saw a family of Tigers; the mother, father and two sub adults. Later we decided to wait at the waterhole and saw a lot of bird activity. We also heard a faint growl behind the waterhole. As we were waiting we also spotted a Sloth Bear crossing the road.

Once back at the lodge, we completed the checklist followed by dinner.

Day 6

Sunday 1st April

Today was our last safari in Tadoba National Park and we were keen to spot Tigers. We drove straight to Panderpauni waterhole where we saw the dominant Tiger. On the way back we also saw Bengal Monitor Lizard.

Once back at the lodge, we had enough time to clean, change and pack before lunch. Afterwards we started our four-hour journey to our next destination; Pench National Park, arriving before sunset.

In the evening we did the checklist followed by a flavoursome dinner.

Day 7

Monday 2nd April

We woke to a pleasant morning and after a refreshing beverage, headed for our morning safari. We all were excited. We saw quite a few birds and heard a few distress calls of Langurs and Spotted Deer. Chris was keen to spot River Tern, but Peter and June saw it first. Later in the drive Chris, Susan and Sue also saw the River Tern, and we also saw a few vultures and Red-crested Pochards.

After lunch we went on another safari during which we checked a few waterholes. It was a bit quiet but we heard distress calls near Bija Matta waterhole. Back at the lodge we completed the checklist and then had dinner.

Day 8

Tuesday 3rd April

Today was our last safari in Pench National Park. We checked the Sita Ghat, a scenic area where we saw quite a few birds including White Stork, Indian Chat and Asian Openbill. While we were watching the birds we heard a few distress calls of Spotted Deer.

Back at the lodge, we had an early lunch at noon before setting out on our journey to Satpura National Park. It was a long drive on the meandering roads, passing through the beautiful countryside of central India. We stopped for refreshments before Chindwara and then Tamia before reaching Reni Paani Jungle Lodge around 7.45pm. After dinner we called it a night

Day 9

Wednesday 4th April

We drove in two jeeps to the park entry point, and then on foot across the river. As we started our safari we saw quite a few birds including Spoonbill and Grey Heron, while crossing the Madai meadow. Later we got lucky with a Leopard sighting. The Leopard was in a patch of grass and after a while we got a good view when it stood up and started walking.

Back at the lodge we had a delicious brunch and time to rest and charge camera batteries. Being Wednesday, the park was closed this afternoon so we went on a birding cum night safari in the buffer zone. We started around 4pm after tea and coffee and set out in two jeeps with searchlights. As we reached one of the waterholes, there were a few jeeps already lined up. We secured our place and within minutes we saw a female Sloth Bear with two young cubs come to the waterhole to drink. The cubs were playful and fun to watch. Later we explored the area to look for birds. At an area close to the river and saw quite a few Spoonbills, Painted Storks, stints and sandpipers, to name a few.

Later we met to do the checklist, which was followed by dinner.

Day 10

Thursday 5th April

Today we had a drive in the park. As soon as we started the safari, people in one jeep found the fresh tracks of both male and female Tigers. We started tracking but after some distance lost the tracks. We had stopped at a junction when Yusuf heard a faint distress call of Langur. We quickly reversed our vehicle and drove in the direction of where the calls were coming from. We reached the spot and saw a Langur looking down towards the parallel road and giving fanatic distress call. We drove further and saw Tiger tracks over our vehicle tracks. As we drove a metre ahead we saw a beautiful Tigress walking on the road. We followed her for quite a distance as she was pretty much relaxed and marking her territory. After 10 minutes our other vehicle containing Chris, Suzanne and Sue arrived. They too saw the Tigress. Soon the place was crowded by vehicles. It was an awesome sighting. We also saw Indian Giant Squirrel and quite a few birds.

Later we again went for the drive in the park, during which we saw a Tree Shrew near a small puddle of water and Gaur.

In the evening we followed our usual routine of checklist followed by dinner.

Day 11

Friday 6th April

Today we went to a different zone in the park called Chutidev. It was a steep uphill drive. The drive was quite interesting and we saw the tracks of Sloth Bear, Leopard and Tiger. We saw across a Changeable Hawk-Eagle nest with the eagle in the nest. Later we reached a scenic viewpoint where we left the vehicle to head to a rocky patch to have breakfast. The breakfast point was mesmerising and we could see for many kilometres.

Our afternoon drive was even more exciting. We reached a hillock and got the news that a Leopardess had gone into a den. We parked at a vantage point where we could partly see the tail of the Leopardess. After waiting for over an hour, she emerged from the den, yawned and went to the next boulder and sat down, looking at us. It was a great opportunity to photograph one of the most elusive cats. She sat there for a long time before standing up and moving towards the cliff, and then walking on the cliff before moving to the other side of the ridge. We quickly reversed our jeep and went on the other side, where we saw her walking on the road before disappearing into the wood.

In the evening we did the checklist, followed by dinner.

Day 12

Saturday 7th April

Today was our last activity in the park. Chris, Suzanne and Pete decided to do a walk in the park, whereas June and Sue wanted to do a drive in Parsapaani. Those on the walk went with the lodge naturalist, whilst Yusuf accompanied June and Sue. The drive was quite interesting and we saw quite a few birds including Indian Eagle-Owl. The walkers saw a few interesting birds including a nesting Oriental Skylark. It was a wonderful morning for both groups. We came back to lodge for breakfast.

Pete and June were continuing on the Kanha extension, so left at 11.15am with a packed lunch. The rest of us had lunch at the lodge and left for Bhopal at 1.15pm. On the way we visited Bhembetka rock shelters which we explored for about 40 minutes. We reached Bhopal at 7.15pm. After check in, we met at the Shahnama restaurant for dinner. After dinner we said thanks and goodbyes to Yusuf.

Day 13

Sunday 8th April

We met in the lobby and were transported to the airport to catch our early morning flight to Mumbai, and then another to Heathrow, where our Naturetrek adventure came to an end.
