## Day 1

**Wednesday 5th September**

We arrived in Lima at various times on our various flights, met Renato our local guide and transferred to our comfortable hotel in the fashionable suburb of Miraflores.

## Day 2

**Thursday 6th September**

After a leisurely breakfast we drove to the Pantanos de Villa marshland reserve on the southern limits of the sprawling Lima conurbation. In a short time we saw a wide range of birds that included Giant Grebe, Little Blue Heron, Cinnamon Teal, Wren-like Rushbird and Many-coloured Rush Tyrant – a great start! Moving on to the nearby beach we saw a further range of waders and waterfowl plus offshore, a large raft of Red-necked Phalaropes, a Peruvian Diving Petrel and amazingly, a mighty Humpback Whale that surfaced several times close inshore.

Next we drove south along the coast to the small fishing village of Pucusana where we took a short boat ride around the harbour and along the surf-lashed, cliff-bound shore and enjoyed excellent views of masses of Inca Terns, Peruvian Boobies and Peruvian Pelicans, plus several Red-legged Cormorants, a couple of Blackish Oystercatchers and at least four Surf Cinclodes. A number of impressive Southern Sea Lions completed the picture here and concluded a very enjoyable hour.

From Pucusana we continued south along the desert coast on the Pan-American Highway. A stop at the Pantanos de Viejo marshes added White-cheeked Pintail, Wilson's Phalarope, Peruvian Meadowlark and Grassland Yellowfinch to the list, whilst a little further on a group of nine Peruvian Thick-knees roosting in a roadside field provided some last avian interest before we pushed on to Ica and our hotel for the next two nights.

## Day 3

## Friday 7th September

Most of us were out at first light walking along the beach and were rewarded with sightings of a group of Bottle-nose Dolphins just offshore, a couple of delightful Peruvian Terns fishing in the shallows, a family of Burrowing Owls standing around outside their burrow, a couple of neat little Coastal Miners, some Black Skimmers skimming and masses of waders and gulls.

After breakfast we drove to Ica, about an hour to the south. Here we explored the fields, scrub and gardens both around the airport and at Las Dunas Hotel and found Croaking Ground Doves, Vermilion Flycatchers, Long-tailed Mockingbirds, Streaked Saltators, Groove-billed Anis, Hooded Siskins and Saffron Finches. We spent some time watching *Amazilia* Hummingbirds and Peruvian Sheartails feeding at flowers on the Eucalyptus trees and concluded an eventful morning with excellent views of a pair of Black-necked Woodpeckers, our top target bird.

After lunch at the picturesque oasis of Huacachina we drove back up the coast to Paracas and out across the National Reserve to the spectacular sea-cliffs of La Cathedral where we admired the dramatic scenery and the Turkey Vultures that cruised past us at eye level, skilfully riding the powerful up-draughts. Finally we walked down to a nearby beach, a vast sweep of sand and crashing surf backed by the abject desert inland. Grey Gulls and a range of waders worked along the strand line but otherwise this was a deserted place and a fittingly dramatic spot to end a full and enjoyable day.

## Day 4

## Saturday 8th September

After an early breakfast we drove the short distance to the bustling quayside in Paracas town and boarded a speedboat for our trip out to the Ballestos Islands. After we had admired the enigmatic Candelabra figure etched on a hillside above the shore of the bay we continued fast out to sea towards the distant Ballestos, just visible in the distance garua murk. Several neat little White-vented Storm Petrels, some of which passed very close to the boat, kept the avian interest going until we arrived at the islands and were met by one of the world's great avian spectacles.

As we cruised slowly around the cliffs and arches we were amazed at the sheer number and close proximity of the birds. Guanay Cormorants and Peruvian Boobies were present in their tens of thousands and in amongst them were hundreds of Peruvian Pelicans, Neotropic Cormorants and Inca Terns. Here and there we found pairs of colourful Red-legged Cormorants and little groups of Humboldt Penguins, some surprisingly high up on the cliff faces. The whole amazing picture was completed by Turkey Vultures soaring incongruously over the cliffs and Southern Sea-lions loafing on the rocks – fantastic!

Back at Paracas we transferred to our bus and headed to the national reserve again. Our first stop was at picturesque Lagunillas where we walked along the rocky shore and found over 100 South-American Terns roosting on the point and a range of waders that included several Least Sandpipers, two Willets and a Wandering Tattler. From Lagunillas we went to the national park visitor centre and the bay-side viewpoint nearby where we enjoyed good views of over 70 Chilean Flamingos. In the afternoon we drove back along the coast to Lima and finally arrived in Miraflores just before sunset with plenty of time to prepare for our imminent jungle adventure...

## Day 5

## Sunday 9th September

After breakfast we drove to the airport and soon we were airborne and climbing through the garua mist, up and over the spectacular snow-capped Andes and down into the green vastness of the rain forest beyond. We arrived at Puerto Maldonado in the late morning. A Great Potoo roosting in a tree by the airport approach road got things off to a good start before we boarded our bus for the short journey to the little port of Infierno. A Crimson-crested Woodpecker and then a Sapphire-Spangled Emerald Hummingbird attending a well-grown youngster in its amazing little nest kept us occupied as the baggage was transferred to our boat and then we set off up the Tambopata River to the Posada Amazonas, about an hour upstream.

It was lovely to be out on the river and as we chugged along through the ever-changing forest vistas we saw our first Red-and-green Macaws, two roosting Ladder-tailed Nightjars and a number of other common riverside birds. We arrived at the Posada in the mid-afternoon and after settling in to our comfortable rooms we set off along the trails. Overall it was a fairly quiet afternoon but we had good views of Brown Capuchin and Squirrel Monkeys and encountered a reasonably satisfying range of birds that included Spix's Guan, Black-tailed Trogon, White-throated Toucan, Olive Oropendola and Black-throated Antbird. We walked back to the lodge in the gathering darkness with fireflies flashing around us and Cicadas buzzing– welcome to the jungle!

## Day 6

## Monday 10th September

In the first part of the morning we visited a nearby oxbow lake and spent an enjoyable couple of hours floating sedately on a large wooden pontoon. We were unlucky in that we didn't see the local Giant Otters but the birding was excellent with great views for all of Hoatzin, Sungrebe, Capped Heron, Anhinga, Horned Screamer, Black Caracara, Pale-vented Pigeon, Amazon Kingfisher, Black-capped Donacobius and Lesser Kiskadee. In the tall trees around the lake we also saw Red Howler, Brown Capuchin and Squirrel Monkeys, and as we walked between the river and the oxbow we saw Emerald Toucanet, Blue-crowned Trogon, Chestnut Woodpecker, White-browed Antbird and Masked Crimson Tanager – all in all, pretty good!

Back on the river and underway upstream again we settled down and watched the forest unfold ahead of us. Several Red-and-green Macaws got things off to a good start and at the first check-point we had nice views of an adult King Vulture soaring overhead. Continuing on up river through the early afternoon we saw several Capybara (all with their attendant Giant Cowbirds), a Spectacled Caiman, a number of Side-necked Terrapins and an exciting range of birds that included an Orinoco Goose, two Collared Plovers, a Pied Lapwing, a Large-billed Tern, several Plumbeous Kites and a Bat Falcon. We finally made it to the Tambopata Research Centre in the late afternoon. After settling in some of us went for a short stroll and finished the day with good views of a Blue-throated Piping Guan and a Great Tinamou.

## Day 7

Tuesday 11th September

A pre-dawn departure from the lodge ensured that we were comfortably in place at the clay cliff or colpa before daybreak. Even at this early stage the trees around our viewing point were full of screeching parrots and as the light improved the noise increased as more and more birds assembled. Over the next couple of hours we enjoyed the extraordinary and wonderful sight of hundreds of parrots and macaws, colourful and charismatic, coming down in great swirling flocks to eat clay from the cliffs. Undoubted stars were the big macaws and we had superb views of Blue-and-yellow, Red-and-green and Scarlet. Additionally however there were dozens of the smaller Chestnut-Fronted and Red-bellied Macaws and two very handsome Blue-headed Macaws. Mealy and Yellow-crowned Parrots were also present in good numbers and in amongst them we found dozens of Blue-headed and Orange-cheeked Parrots and several White-bellied. Other notable sightings on this superb morning included Blue-throated Piping Guan, Roadside Hawk, Pale-legged Hornero, Greater Kiskadee, Red-capped Cardinal, Yellow-browed Sparrow and a sensational Sunbittern that potted around in full view on the muddy creek-shore below us.

The walk back to the lodge was enlivened by a close encounter with a large group of noisy (and smelly!) Collared Peccaries and a trio of striking Red-necked Woodpeckers and then after breakfast and a short break we set out on the trails again. It was a privilege indeed to walk through such pristine rain forest and during the course of the morning we encountered an excellent range of birds that included Striolated Puffbird, Blue-crowned Trogon, Thrush-like Wren, Screaming Piha and Plumbeous Antbird. The overall highlight however was a troop of ten or so Pale-winged Trumpeters that we enjoyed fantastic views of as they made their way across the forest floor. They seemed oblivious to our presence and were vocalising strongly, a mix of grunts, chirps and the most extraordinary growling – wonderful!

In the late afternoon we took a look around the lodge clearing and then walked along another trail and were rewarded with lovely views of a Brown Capuchin Monkey demonstrating the use of its prehensile tail and a range of birds that included Rufous-capped Antthrush, Lemon-throated Barbet, Red-stained Woodpecker, Epaulette Oriole, Pygmy Kingfisher and a couple of dazzling male Band-tailed Manakins.

## Day 8

Wednesday 12th September

A second dawn session at the colpa brought us another glorious parrot extravaganza at least as good as the first, this time with a supporting cast of a Razor-billed Curassow and both Purplish and Violaceous Jays. Then after breakfast we took our leave of Tambopata Research Centre. The walk back to the landing stage produced good views of Casqued Oropendola, White-fronted Nunbird, Buff-throated Woodcreeper and another superb Rufous-capped Anthrush.

Once back on the river we enjoyed a pleasant voyage downstream retracing our journey of a couple of days previously and seeing much of the same wildlife including some more Capybara, several Side-necked Terrapins, Greater Yellow-headed and King Vultures, Orinoco Goose, Yellow-billed Tern and Pied Lapwing. Particularly memorable however was a group of 20 or so immaculate Sand-coloured Nightjars roosting on a gravel bank. We boated right up to them and were able to fully appreciate their delicate beauty and the cryptic perfection of their camouflage.

We arrived at the Refugio Amazonas in the early afternoon. After settling in we walked to the canopy tower and enjoyed an excellent late afternoon session with good views of Starred Woodquail Wedge-billed Woodcreeper and Black-throated Antbird along the trail and then Curl-crested Aracari, Golden-collared Toucanet, Collared Trogon, Gilded Barbet and Crowned Slaty Flycatcher from the tower itself – not bad!

## Day 9

## Thursday 13th September

A ferocious thunderstorm in the small hours freshened things up nicely and after an early breakfast interrupted by a Reddish Hermit zapping around the dining area we left the Refugio, walked down to the dock and boarded our boat for the last time. The relatively short ride in fine sunshine was as enjoyable as ever and pleasantly enlivened by a series of Capped Herons and a small flock of Muscovy Ducks that took to the air as we approached. After a brief break at Infierno where we noted a Little Woodpecker, a Great Antshrike and a couple of Plain-crowned Spinetails we continued by bus to Puerto Maldonado and civilisation and in no time were airborne and heading towards the Andes, leaving the jungle far behind and below.

Arriving in Cusco we immediately noticed how much thinner the air was as we struggled to walk and talk at the same time. Outside the airport we were met and whisked off to lunch in a restaurant in the centre of town. Suitably replete we took a brief siesta at our hotel and then in the late afternoon our local guide Wilbert gave us a guided tour of some of the major sights of this remarkable and beautiful city. We finished the day with dinner at a nearby pizza restaurant.

## Day 10

## Friday 14th September

After breakfast we set off to picturesque Huacarpay Lake an hour or so to the south of Cusco. Shallow and marshy and surrounded by grassland and scrubby hills with a backdrop of spectacular mountains, Huacarpay is a wonderful place to explore and in a short space of time we saw a wide range of birds including White-tufted Grebe, Speckled and Puna Teals, Andean Ruddy Duck, Andean Coot and Wilson's Phalarope. Plumbeous Rails and Wren-like Rushbirds skulked in the rushes, Puna Ibis waded in the shallows, Andean Lapwings strutted around on the fringing grassland and handsome Andean Gulls passed low over our heads. Other smaller birds included Bare-faced Ground Dove, Rusty-fronted Canastero, White-browed Chat-Tyrant, Mourning Sierra Finch, Yellow-winged blackbird and a brief Bearded Mountaineer.

After a delicious picnic lunch on the terrace of a rustic café by the lake shore we got back in to the bus and drove along the sacred valley to Pisac. Here we explored the remarkable Inca ruins and added Black-chested Buzzard Eagle, Mountain Caracara and Giant Hummingbird to the bird list before returning to Cusco in good time to prepare for our time on the Inca Trail.

## Day 11

## Saturday 15th September

After breakfast we boarded our bus and headed out of Cusco and across the high altitude Chinchero plateau noting American Kestrels, Spot-winged Pigeons and a Black-chested Buzzard Eagle along the way. Dropping down into the Sacred Valley we passed through Urubamba and continued to the small and bustling little town of Ollantaytambo where we had a chance to stock up with any last minute supplies before beginning the trail.

A little further on, at Chilca, we came to the end of the road and found our porters waiting for us. After a little time adjusting loads the porters set off at their usual brisk pace and we followed, a little more sedately. Keeping close to the river our route took us through a patchwork of farmsteads and dry rocky scrubland and past occasional small Inca ruins. We were on “Torrent Duck Alert” and with regular scans of the river below we soon found our first ones, a duck and a drake together, striking as ever, loafing on boulders and leaping in and out of the foaming water with extraordinary ease and skill. As we watched we realised that they had a couple of well-camouflaged half-size ducklings with them and we were able to watch how these little fellows, learning to be Torrent Ducks, coped with the exacting challenges that their parents encouraged them through as they negotiated the thundering water.

Other birds as we continued along the trail included Andean Swift, White-capped Dipper, Giant Hummingbird, White-winged Cinclodes, White-winged Black Tyrant and Rust-and-yellow Tanager. Towards the end of the afternoon, after a leisurely and enjoyable walk, we arrived at Km 88 to find our tents already erected and the kettle on. In no time we were comfortably settled in and enjoying an excellent dinner under a magnificent star-studded Andean sky.

## Day 12

## Sunday 16th September

Up at first light with a cup of tea we were soon packed and breakfasted. We descended to the nearby checkpoint and bridge and watched Torrent Ducks, Torrent Tyrannulets and a Black-backed Grosbeak whilst our permits were sorted. With formalities completed we crossed the river and continued to the impressive Inca terraces at Llactapacta and then on up the beautiful Cusichaca Valley. The scenery, dominated by the mighty snow-capped peak of Veronica, was superb throughout and a succession of good birds, including a pair of Andean Condors soaring around the crags above us, kept the birding interest going.

We ate lunch in a lovely streamside meadow and then continued on our way up through Huayllabamba village noting Giant Hummingbirds, Sparkling Violetears and Golden-billed Saltators en-route. Above Huayllabamba we found a Tyrian Metaltail and our first Great Thrush and then on the last stretch before we dropped down into our campsite we bumped into a small mixed flock and had good views of two Creamy-crested Spinetails and a pair of Spectacled Whitestarts, a nice end to an enjoyable day.

## Day 13

## Monday 17th September

Up and away again shortly after first light, the trail took us steadily upwards through some excellent patches of cloud forest and we enjoyed some rewarding birding as we walked. Hummingbirds were much in evidence and during the morning we saw several species including Shining and White-tufted Sunbeams, Sapphire-vented Puffleg and Violet-throated Starfrontlet. Other notable sightings included Pearled Treerunner Rufous-breasted Chat-Tyrant, Masked Flowerpiercer, Scarlet-breasted Mountain Tanager and some more Creamy-crested Spinetails.

We stopped for lunch at Llulluchapampa and then walked up through the open, boulder-strewn meadows above where we found a couple of Plumbeous Sierra-Finches, several Bar-winged Cinclodes and a superb Andean Flicker. From here we began the long, hard climb to the top of the infamous Dead Woman’s Pass, the toughest stretch of the trail and the highest point at 4,200 metres.

Regular Black-throated Flowerpiercers in the scrub and a fine little Blue-mantled Thornbill flitting around some flowers kept the bird interest going but people mostly had their heads down for the climb. Everyone managed admirably and it was a satisfied crew that posed for the customary photographs at the top before beginning the descent out of the cloud and down through some fine paramo habitat to the campsite at Pacamayo. The rain that had begun as we topped the pass ended a little after dark and the clouds rolled away to reveal another stunning star-filled sky – wonderful!

## Day 14

## Tuesday 18th September

We woke to a lovely dawn with snow-capped peaks poking up through layers of cloud. Red-throated Cotingas and Undulated Antpittas called unseen in the half-light and added to the atmosphere and a Rufous Antpitta, bold as brass, made an appearance right by the campsite – an excellent start to the day!

We were soon breakfasted, packed up and ready to go. From Pacamayo the path climbed steeply to the dramatically positioned ruins of Runcu Raccay and we paused as we walked to admire the spectacular views and a range of birds that included Sapphire-vented Puffleg, Tit-like Dacnis, Tufted Tit-Tyrant, Vilcabamba Tapaculo (very nice!) and Moustached Flowerpiercer. Beyond Runcu Raccay the steep climb continued but we were veterans by this stage and progress was good. Great Sapphirewings, a Streak-throated Canastero and a Bar-winged Cinclodes kept the birding interest going and in a short time we reached the second pass, where we took a break to recover our breath.

From here we descended to the ruins of Sayacamarca noting a couple of Scarlet-bellied Mountain Tanagers, a gorgeous Golden-Collared Tanager and several more Tit-like Dacnis along the way. We spent a little time exploring the ruins and then continued through a beautiful patch of cloud forest to our lunch stop in the tussock grass clearing at Chaquicocha.

After lunch we walked on along an impressive stretch of original Inca paving through yet more wonderful scenery and habitat. Notable birds here included a Rufous-breasted Chat-Tyrant at its nest built into the overhang of a small cliff-face, another Golden-collared Tanager, two more Scarlet-breasted Mountain Tanagers and a mixed flock comprising three Pearled Treerunners, a White-browed Conebill, a couple of White-throated Tyrannulets and several Three-striped Hemispingus. A Black-chested Buzzard Eagle perched on a distant crag was a nice final touch before we reached the spectacularly positioned ridge-top campsite at Phuyupatamarca.

Having settled in and enjoyed our customary late afternoon tea, a few of us ventured back along the trail in the failing light and finished the day with a Brown-backed Chat-Tyrant and sensational views of a pair of amazing little Puna Thistletails sidling up and down some slender bamboo stems – lovely!

## Day 15

## Wednesday 19th September

We woke at dawn and with breakfast completed we said goodbye and thank-you to our team of porters and negotiated the steep steps down to the precipitously positioned ruins of Phuyupatamarca. There were few signs of life at first in the early morning cold but a pair of Inca Wrens flicking back and forth across the trail was a good start and shortly after this we met a sizeable mixed flock that crossed the trail just ahead of us and provided us with some very exciting and fast-moving birding!

Among the highlights were three or four Marcapata Spinetails, a pair of Citrine Warblers, a Slaty Brushfinch, two Unstreaked Tit-Tyrants, a Blue-backed Conebill and several Black-capped Hemispingus. The trail continued to descend steeply and as we lost altitude and the morning advanced, so the temperature rose. We were soon walking through rich sub-tropical rainforest and the views across the steep, forested slopes and down to the rushing Urubamba River were superb. The birds continued to be good too and during the course of the morning we encountered an excellent range of exciting species which included a couple of colourful Hooded Mountain Tanagers, two Plushcaps and a lovely little Golden-browed Chat-Tyrant.

We reached Trekker's Lodge in the late morning and before eating our lunch we took a brief look at the nearby ruins of Winay Wayna where we met another mixed flock which, at this lower altitude, included Barred Becard, Dusky-capped Flycatcher, White-banded Tyrannulet, Hepatic Tanager and Superciliated Hemispingus.

In the early afternoon we set off on the last leg. The afternoon was warm and the forest lovely and a superb male Masked Trogon delayed us for a while but we were on a mission now. Soon we made that last little climb up to the Sun Gate and there below us lay the magnificent sight of Machu Picchu... We all paused to enjoy the moment, take photos and congratulate each other on our achievement.

Then, tired but elated, we strolled on down into the city itself where Wilbert led us on a tour of this fabulous and inspiring place. Finally, as the shadows lengthened, we caught the last bus down into Aguas Calientes and checked into our luxurious hotel.

## Day 16

## Thursday 20th September

A full morning at Aguas Calientes gave us all plenty of time to relax after the rigours of the trail. We divided our time between exploring the town and its various markets and strolling around the bird-rich forested grounds of the hotel. Hummingbirds were much in evidence as usual and we enjoyed great views of Green-and-white Hummingbird, Chestnut-breasted Coronet, Gould's Inca, and Violet-throated Starfrontlet, whilst an impressive array of Tanagers coming to specially positioned bananas included Blue-necked, Beryl-spangled, Blue-and-yellow, Golden-naped, Silver-backed and Saffron-crowned. A wide range of other birds during this excellent morning included Andean Guan, Highland Motmot, Dusky-Green Oropendola, Golden-Olive Woodpecker, Streaked Xenops, Common Tody-Flycatcher and a stunning male Cock-of-the-Rock.

After a delicious lunch we caught the train back towards Cusco. The journey along the Urubamba Valley was as spectacular as we had anticipated and was further enlivened by good numbers of Torrent Ducks and a few White-capped Dippers. We transferred from the train to a bus at Ollantaytambo and arrived back in Cusco at the end of the afternoon with plenty of time for that last bit of shopping and one more pizza...

## Day 17

## Friday 21st September

An early morning flight took us back over the Andes and down to Lima. We were efficiently met by our local guide for the day and whisked off for an authoritative and interesting tour of the colonial part of the city. After lunch at a city centre hotel we visited the excellent National Museum of Archaeology and Anthropology before heading to the airport. The check-in went smoothly and our evening flights left on schedule...

## Day 18

Saturday 22nd September

Return to the UK

### Acknowledgements

Thanks to Renato, Oscar, Wilbert and all our various drivers, porters, cooks, fixers and other guides who all worked very hard to ensure that we had a thoroughly enjoyable time. Special thanks also to all the members of the group for helping to make the trip so memorable and enjoyable.

### Receive our e-newsletter

Join the Naturetrek e-mailing list and be the first to hear about new tours, additional departures and new dates, tour reports and special offers. Visit [www.naturetrek.co.uk](http://www.naturetrek.co.uk) to sign up.

### Naturetrek Facebook

We are delighted to launch the Naturetrek Facebook page so that participants of Naturetrek tours can remain in touch after the holiday and share photos, comments and future travel plans.

Setting up a personal profile at [www.facebook.com](http://www.facebook.com) is quick, free and easy. The [Naturetrek Facebook page](#) is now live; do please pay us a visit!

## Species List

Birds (h = heard only)

	Common Name	Scientific Name	September																
			6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	
1	Great Tinamou	<i>Tinamus major</i>					1	1											
2	Undulated Tinamou	<i>Crypturellus undulatus</i>				h	2h												
3	Bartlett's Tinamou	<i>Crypturellus bartleti</i>								1h									
4	Horned Screamer	<i>Anhima cornuta</i>						2											
5	Pied-billed Grebe	<i>Podilymbus podiceps</i>	4	1															
6	White-tufted Grebe	<i>Rollandia rolland</i>										3							
7	Great Grebe	<i>Podiceps major</i>	10	1	3														
8	Humboldt Penguin	<i>Spheniscus humboldti</i>	4		90														
9	White-vented Storm Petrel	<i>Oceanites gracilis</i>			10
